

MARK INFORMATION WISHES YOU A NICE SUMMER

Dear

Summer has arrived bringing sun and higher temperatures, and holidays are just around the corner for most people. Here is our latest news:

- On our extranet Mark+ you can now order hardware parts directly
- A new servicepack 3.21.02 for ProMark has been launched - [please contact Customer Care](#) if you wish to install it. More on this below.
- A warm welcome to all our new customers
- ProMark Portal continues to be successful: 13 customers have invested in the portal already this year!

We wish you, your family and colleagues a really great summer!

Best regards
Mark Information UK

BUY HARDWARE ON-LINE

We have made it easy for all our customers to order hardware parts on the internet. Just log on to our extranet Mark+ and find the item in the hardware catalogue.

PROMARK SERVICEPACK 3.21.02

ProMark servicepack 3.21.02 is now available for all customers with a maintenance agreement. In addition to some smaller features and corrections, this version primarily contains the below features:

USER / APPROVER OVERVIEW

ProMark now gives you a simple overview of users' access to departments and approval groups - and the list can be printed or exported to e.g. a spreadsheet.

User ID	User name	Approval groups restr.	Approve period totals	Approve transactions	Work center restrictor	Department restrictions
MAN	Manager us	No	Yes			Field Selection
MARK	Mark User	No	Yes			Sort Order
SUPER	Super user	No	Yes			Refresh Data
						Dump as HTML
						Dump as CSV
						Invert to Company default
						Save as the Company default
						Invert to system default

Show Inactive

User list: SUPER

Approve transactions Approve period totals

Buttons: Transactions, Export totals

TEAMWORK OVERVIEW

A new screen gives the immediate overview of which orders/operations are in process in a work center and possibly on which resource/team. For each individual operation is displayed which employees are registered on the job.

The screen also allows you to identify employees who are not presently registered on any job.

Especially for companies using the ProJob Teamwork solution in ProMark, this new screen can give you a considerable improvement in viewing the current status of your production.

NEWS

- Molybden in Trelleborg, Sweden, has implemented registration on their shop-floor. Success from the first month!
- The Tican slaughterhouse turns to IT in the hunt for efficiency

ESBE2	Eibe_2	Eibe		ESBE1	30	Order 1	

ABILITY TO ENTER TIME SUPPLEMENTS WHEN REPORTING ON OPERATION

It is now possible to enter one or more time supplements in connection with job out and reporting on the job finished.

Any registered job time will then also be posted on the account for the supplement selected and can thus be sent to the payroll system as a normal payroll transaction.
