

PROMARK 3.20 RELEASED - AND WELCOME TO NEW CUSTOMERS

The summer holidays are over and we hope that your body and mind have been rejuvenated by a little sunshine! As life returns to its normal routines, most of us are finding that everything is looking a bit brighter than it was a few months ago. In spite of continued scepticism, slackness and sound conservatism, many companies are reporting an improving market.

At Mark Information we also feel these positive winds, both among existing customers and through our new customers and employees. We continue to develop ProMark at full speed, and with the launch of version 3.20 we can share some exciting developments.

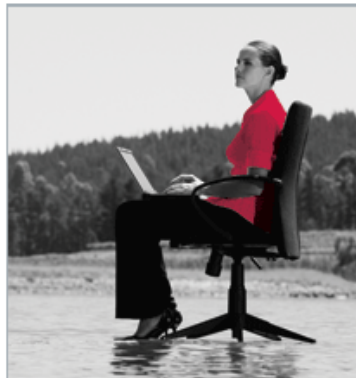

Kind regards
Steffen Meyer
Man. Director

PROMARK VERSION 3.20
