International Workforce Management solution increases dedication and strengthens follow-up

Comparable management information across borders, a more streamlined payroll process and IT-related economies of scale are some of the more obvious advantages of an international dimensioned Workforce Management solution.

Survey among experienced users of ProMark and a Workforce Management expert points to new aspects of the benefits in the form of strengthened follow-up, higher employee engagement and increased employee mobility.

"Having a uniform basis for comparison provides better opportunities for improving follow-up processes," says Ulla Amtoft, who is HR manager at Coor Service Management.

Read more personal and interesting observations from corporations with experience in a common international Workforce Management solution.

New partnership with Aarsleff: Digitization of construction sites

Aarsleff, the leading construction company in Denmark, is currently working hard to streamline their processes.

Hence, they have just signed a partnership agreement with Mark Information on digitization of the weekly time sheets from the construction sites

that form the basis for correct remuneration of employees and billing of customers.

Mark Information acquires WinTid from Dansk Tidskontrol

We are happy to announce that Mark Information has acquired the WinTid activities from Dansk Tidskontrol A/S effective from 3 April 2017.

WinTid is a time & attendance solution which also offers job registration, project registration and access control. In addition, WinTid Danmark is Kaba's distributor in Denmark. As ProMark has been able to integrate with terminals from Kaba for some years, there is a great synergy between the two companies.

As part of the acquisition, 73 customers will be transferred to Mark Information. They are guaranteed continued support and assistance with the system as Mark Information will take over three experienced employees too.

We look forward to our future cooperation.
