

PROMARK WORKFORCE MANAGEMENT

ProHost

INTEGRATION WITH PROMARK

The ProHost module allows the effective transfer of data between ProMark and other business systems. ProHost already contains a large number of standard integrations and the list keeps growing.

EASY INTEGRATION WITH OTHER BUSINESS SYSTEMS

INTEGRATION WITH PROMARK

ProMark is a Workforce Management system that collects payroll and production related data. ProHost permits system integration between ProMark and other business systems (such as HR, payroll and ERP systems) thus allowing data to be shared.

ProHost offers a large number of standard integrations and has advanced configuration capabilities.

INCREASES THE EFFICIENCY OF THE TOTAL INFORMATION SYSTEM

ProMark is a unique tool for the collection, presentation and distribution of data. By integrating with other business systems via ProHost, this information is shared to create a more efficient and highly effective management system; one that allows you to react, control and adjust based on relevant, current data.

In other words, ProMark makes it possible to increase the relevance and credibility of:

- Attendance data
- Absence data
- Planning data
- Production data
- Stock data and
- Cost data

– at every level.

PROMARK ADDS VALUE TO OTHER SYSTEMS

ProMark is a niche product which greatly enhances the value of other business systems, such as ERP, payroll and HR systems. By effectively integrating ProMark with these systems (using ProHost), the result is a total information system that offers considerably more flexible and efficient support of the company's business processes.

Mark Information's highly experienced consultants make the installation of ProHost and the integration of ProMark with other business systems a smooth and simple task.

VALUABLE AND UP-TO-DATE INFORMATION

ADVANTAGES OF INTEGRATION WITH PROMARK

By integrating other business systems with ProMark, valuable and current information becomes available where it is needed, when it is needed and without any risk of human errors or delays. Simultaneously, it eliminates a series of administrative routines in payroll calculation, production planning, purchase, logistics, inventory, sales, management etc.

ProHost connects modern business solutions (such as ERP) with the real world, and synergy arises in providing our customers with a solid and factual basis for decisions.

BENEFITS ALL BUSINESS PROCESSES IN THE COMPANY

ProHost allows the right information to be available in the right systems. This optimises the ability to focus on the important matters as well as the possibility to adjust plans immediately when unexpected incidents occur. This total information system conveniently provides a flexible and effective support of the company's business processes.

ACTIVE MANAGEMENT INFORMATION

BENEFITS FOR THE COMPANY

The efficiency of the total information system is increased considerably by using ProHost to integrate different administrative systems. What used to be subsequent reporting on circumstances that could not be changed, now suddenly becomes active management information on what goes on this very minute.

Other benefits are:

- Reduced number of manual routines
- Fewer errors in the transfer of data
- Faster information
- Higher efficiency
- Faster reaction to deviations and unexpected events

Mark Information has more than 400 customers. In every case, ProMark is integrated with one or more of the customer's other business systems – and always with payroll.

**STANDARD
INTEGRATIONS**

Currently, ProMark offers standard integration with the following systems:

PAYROLL SYSTEMS

3P-løn	HR-plus maps	PA-Løn
Agda	Huldt & Lillevik	Personec L
ASPECT/4	IBS-Løn	Personec S
AXO Royal	Kontek	PI-Løn
BAS/400	Lessor	POL
Carat Løn	M*LØN/LEC-Løn	Sage
Concorde XAL	Mapics	SAP-HR
DAC	MoorePay	SAP-Payroll
DA-løn	Movex	SLS Fravær
Dataløn	MR-Løn/KMD Perspektiv	SLS Løn
