

## Mark Information now certified as ISAE 3000 compliant

As a data processing company, Mark Information takes data protection very seriously. Therefore, we are happy to announce that we are now certified as ISAE 3000 compliant by PwC.

The assurance report is a seal of approval that we protect the data we handle and have processes and controls to, among other things, meet the GDPR requirements. This applies both to the service we deliver and the software we develop. Thus, the assurance report is a guarantee towards our customers that we meet the strong demands of a modern and secure IT supplier.

**ISAE 3000**

## At the forefront of exploiting Progress technology

Progress has been our primary technology partner for around 30 years, providing the platform that ProMark is built on.

Compared with other software companies, Mark Information is at the forefront of exploiting the latest technology from Progress. Therefore, they have prepared a case study on us.

The new possibilities provide the basis for the entire modernisation of our portal solution, ProPortal, where we develop a whole new foundation with a greatly improved performance. They also provide the basis for the redesign of existing webparts and development of new ones.

The new portal will be launched in 2019 but the webparts will continuously be launched and can co-exist with the current ProPortal.
