

Another great leap forward on scheduling

We have now supplemented our modules for staff rostering and shift scheduling with the possibility to forecast manning needs and create a budget, in hours or pounds.

The information is available in connection with the employee scheduling allowing you to see whether the plan stays within budget and meets the manning needs during the scheduling process.

The retail group Pisiffik in Greenland has already started using the new forecasting functionality and achieves great benefits.

ProForecast simplifies scheduling and provides an accurate overview of the cost of any given shift plan. This allows them to plan according to demand and minimum manning needs and enables tight control of payroll costs.

Professional Services strengthened to benefit our customers

Since mid-2020, we have worked to strengthen the management of Professional Services, also called PFS. PFS is our customer-centered department with consultants, project management and Customer Care who takes care of all our customers.

This process is now finished and the management team in PFS consists of:

- Product Manager Jacob Weber
- Account Sales Director Kenneth Back Schiønnemann
- Project Director & Deputy Head John Westerdahl as well as
- Executive Vice President Bo Køhlert
