

Certified integrations simplify the cloud journey

Integrations have been part of the ProMark universe for many years. Integration to the company's payroll system is always part of the setup, but often ProMark is also integrated with other business systems such as HR and ERP.

ProMark's integrations to SAP ERP, SAP HCM and Microsoft Dynamics 365 Finance and Supply Chain Management are already certified – and we can now add two more to the list:

- **SAP SuccessFactors solutions (SAP Cloud Solutions)**
- **Microsoft Dynamics 365 Business Central (BC)**

With these integrations, we have developed a ProMark solution specifically for SAP and Microsoft in their app centres. In other words: A modern, turnkey integration – ready for use. And we are continuously maintaining and updating the solution according to the new SAP and Microsoft cloud versions.

The certifications ensure that ProMark is a reliable extension option that adds value to companies' existing IT landscapes. It offers customers a complete standard solution with built-in integration that supports configuration instead of custom coding – both when it comes to the business system and ProMark.
