

PROMARK WORKFORCE MANAGEMENT

ProBI

PROBI – USE YOUR COMPANY DATA FOR BETTER DECISIONS

ProBI is Mark Information's Business Intelligence solution which enables the analysis of workforce management issues based on the data contained in ProMark. With ProBI, the company can pull data from ProMark into a spreadsheet or any other tool for simple processing and presentation. Additionally, ProBI can deliver data cubes which can be combined with other company data and analysed in the company's own Business Intelligence environment.

In this way, ProBI ensures that data is available when needed and can be used actively as a basis for decisions!

ProBI

ANALYSIS OF PROMARK DATA

PROBI – USE YOUR COMPANY DATA FOR BETTER DECISIONS

ProBI is Mark Information’s Business Intelligence solution. It enables the analysis of workforce management issues based on the data contained in ProMark.

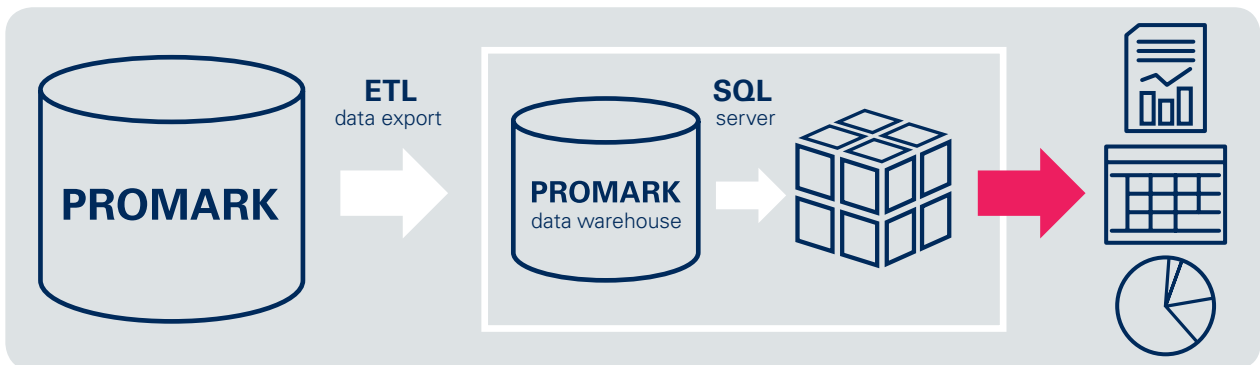

DATA WAREHOUSE FOR PRESENTATION IN SPREADSHEET ETC.

With the use of ProBI, data from absence registrations, project registrations and overtime calculation can be delivered into a data warehouse. This allows the company to analyse and process the data in a spreadsheet or another tool. The company can see its data from a helicopter perspective or dive into the details as needed.

CUBES FOR BUSINESS INTELLIGENCE ENVIRONMENT

If the company has its own Business Intelligence environment, ProBI can provide data cubes for this. It allows to compile ProMark data with other company data and analyse them more profoundly across systems.

SYSTEM LANDSCAPE

DATA ONLY ACCESSIBLE TO RELEVANT USERS

Access to data is governed by the user’s rights in ProMark. This means that the individual user can only work with the data relevant to his/her role and function.

SUPPLEMENT TO PROREPORT

ProBI is an advanced and flexible supplement to the reports that are available in ProReport. The user-friendly reporting tools facilitate the preparation of reports without prior knowledge within the area of Business Intelligence. Simplicity is the key.

ANALYSIS OF CAUSAL RELATIONSHIPS

ProBI makes it possible to analyse causal relationships and prepare reports adapted to the company’s needs at any particular moment.

USE IT FOR ANALYSIS OF:

ABSENCE

**OVERTIME
EFFICIENCY**

**PROJECTS
DATABASE CLEANING**

LARGE QUANTITIES OF DATA, FAST!

Through ProBI, companies can get a clear overview of the valuable data contained in ProMark, and can exploit this data to analyse:

- Analysis of reasons for absence, absence by employee types, how absence varies across countries, divisions and departments, information about these departments such as number of employees, employee categories, periods during which absence was particularly noticeable and much more
- Analysis of overtime and expenses across the organisation
- In-depth analysis of efficiency on orders and operations as well as on employees and workflows
- Follow-up on projects with dimensions and organisational hierarchy
- Finally, ProBI can even be used to get a better overview in connection with cleaning up various profiles in ProMark

**DETAILED INSIGHT INTO
THE STATE OF AFFAIRS**

OVERVIEW, INCREASED INSIGHT AND BETTER DECISIONS

Through ProBI, companies can get a visual overview of large quantities of data enabling them to analyse data more closely whenever they want. Data and reports can be compiled as required to get detailed insight into the business.

**BETTER UNDERSTANDING
OF CHALLENGES**

Analysing absence, for instance, gives companies a rapid and invaluable overview of the scope of their challenges, and highlights areas where action might be required: Where do we have the most stable employees? Why is absence higher in this department? Where should we place production going forward?

**IMPROVED INSIGHT BY
COMBINING DATA**

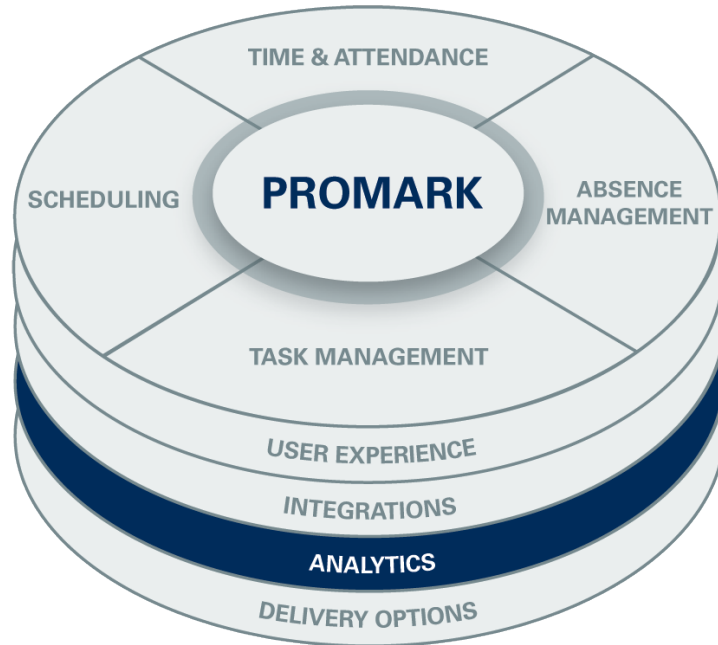

By comparing ProMark data with other company data, such as employee satisfaction surveys, vital information on specific issues can be obtained, which may be seen in a wider context of e.g. top management nature.

**PROMARK DATA AS ACTIVE
BASIS FOR DECISIONS**

In short, ProBI effectively ensures that data becomes available according to needs and relevant situations and therefore can be used actively as a basis for fact-based decision-making.

PROMARK WORKFORCE MANAGEMENT

ProBI is part of the Analytics options in ProMark Workforce Management. With ProMark we help to manage companies' largest and most valuable and strategic resource – the workforce. Contact us at +44 808 23 44 786 for more information about all opportunities or go to www.mark-info.co.uk.
