

ProMark integration with ProHost

SIMPLE INTEGRATION VIA PROHOST

ProHost is ProMark's well-known integration module, offering a wide range of standard integrations to known systems via simple file exchange as well as by using various drivers such as ERP, payroll and HR driver or drivers for Microsoft Outlook Exchange or O365.

The methods are functioning well individually and have been proven over a long period of time. They are fast and easy to implement, can be configured as needed, and are easy to customize afterwards.

ProHost

INTEGRATION OPTIONS

SIMPLE INTEGRATION VIA PROHOST

ProMark can be integrated with other business systems in the company in a number of different ways, from the very simple to the most modern and advanced.

WELL-KNOWN INTEGRATION E.G. BY FILE EXCHANGE

ProHost is ProMark’s well-known integration module, offering a wide range of standard integrations to known systems via simple file exchange as well as by using various drivers for e.g. ERP, payroll and HR systems.

MICROSOFT OUTLOOK

In addition, we have standard drivers for integration to Microsoft Outlook (Exchange or O365).

STANDARD INTEGRATIONS

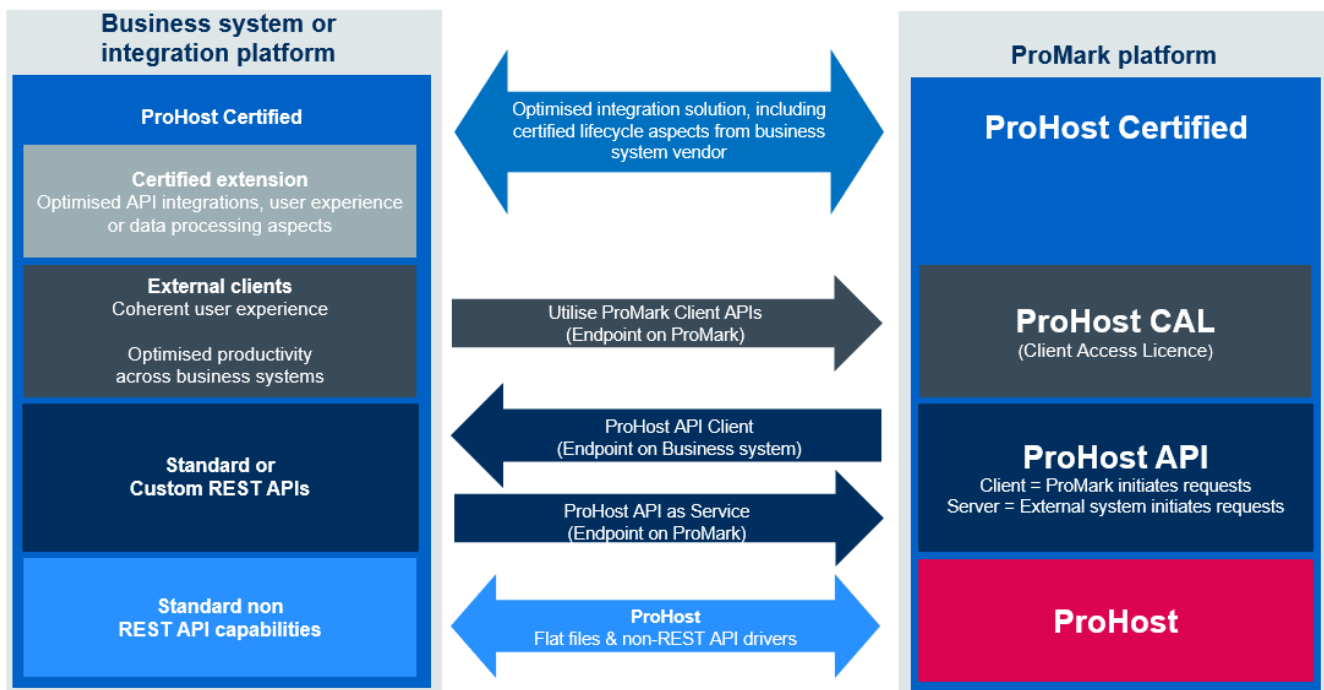

See the list of all the systems we integrate to at:
www.mark-info.co.uk/services/integrations/standard-integrations.

POINT TO POINT OR MIDDLEWARE

ProHost offers a simple form of integration, either from point to point or by using middleware. This type of integration is fast and easily implemented between ProMark and your payroll, HR and ERP system – either with a CSV file driver or with a driver defined specifically for the individual business system.

DATA TEMPLATES SIMPLIFY SETUP

All our standard integrations are documented and easily implemented via a number of data templates which facilitate setup – developed on the basis of our 40 years of experience.

ProHost

PRINCIPLES FOR INTEGRATION WITH PROMARK

The functionality in all our integration solutions is based on these principles:

- Integration of both master data and registrations
- Configuration instead of coding
- Transform data via formulas
- Data templates for fast implementation
- Audit log that keeps track of all actions
- Data transfer is scheduled or initiated as needed

OTHER INTEGRATION METHODS

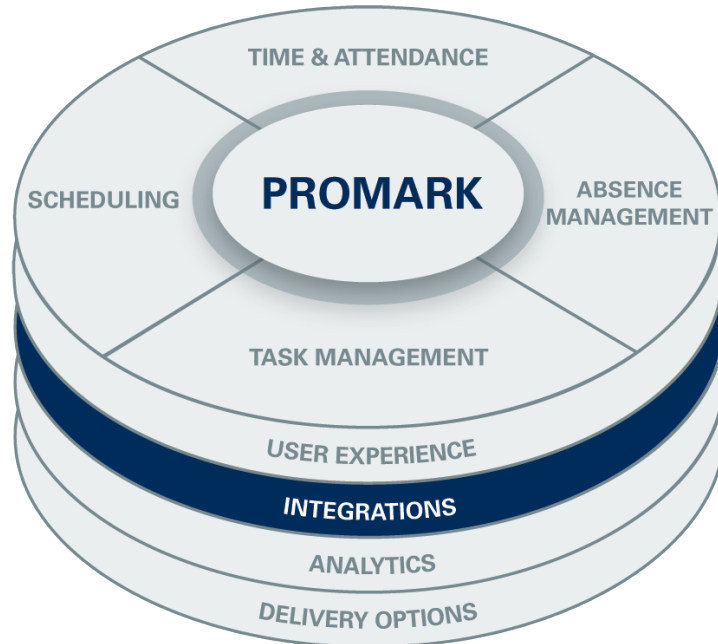

Depending on your need, such as many integrations to various systems, business intelligence and more, it might be that one of our more modern integration methods suit you better.
