

PROMARK WORKFORCE MANAGEMENT

ProPC

PROPC – THE MOBILE WORKPLACE

ProPC is a Windows-based terminal with powerful offline functionality for most kinds of registrations via pc or tablet, in the office and on the go.

ProPC

WINDOWS-BASED TERMINAL ON PC OR TABLET

PROPC – THE MOBILE WORKPLACE

ProPC is a Windows-based terminal for most kinds of registrations, such as clock-in/clock-out, supplements, absence as well as job and project registrations.

EASY INSTALLATION

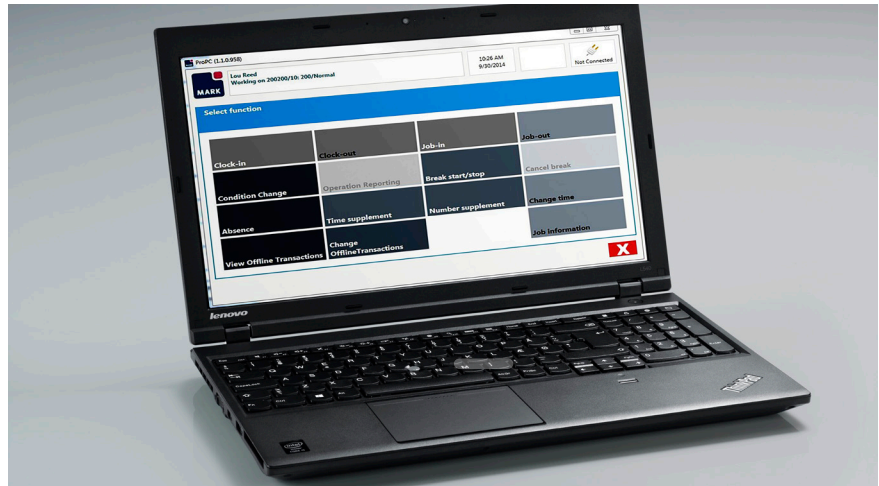

ProPC is as simple to install as an app on any pc or tablet with Windows operating system.

PERSONAL OR SHARED SET-UP

Each ProPC can be configured for general use by all employees, for a group of employees or as a personal client for a single employee where one does not have to identify oneself before registration. The terminal can even be configured so that the employee is only presented with functions that are relevant to him/her.

ACCESS TO COMPANY NETWORK

As ProPC runs on devices that can access the company's common network, all entries will be immediately validated against the company-defined configuration.

INTELLIGENT OFFLINE FUNCTIONALITY

When ProPC is not connected to the ProMark server via network or internet, it can work offline with the same intelligent dialogue. As soon as the pc or tablet is reconnected to the network and ProMark, all registrations are synchronized and validated.

AUTOMATIC UPDATE

If a new version of ProPC is available centrally, each individual ProPC client will update itself once it is online.

This makes ProPC ideal as a mobile workplace for employees who are on the move to carry out their tasks and bring their laptop or tablet as a work tool.

**SEAMLESS
WORK PROCESSES**

EASY AND TRANSPARENT USE

With ProPC employees can log time and activities on an ongoing basis throughout the day while on the move. This saves time and gives a far more accurate basis compared to retrospective entries based on notes and memory.

**FULL SCREEN
UTILIZATION**

ProPC uses the full screen to collate the relevant registrations and information in the same window. This improves the overview and minimises errors.

Activate Windows | Go to system tray Control Panel to activate Windows

VIEW OF TRANSACTIONS

There is a high level of transparency in the system, and the employee can always view and edit the registrations he/she has made even when their PC was offline.

LINK TO DOCUMENTS

ProPC also allows you to link to documents that employees need in their daily workflows.

ACCURATE AND RELIABLE DATA

INCREASED FLEXIBILITY AND CORRECT DATA

With ProPC, the company achieves greater accuracy in all recorded activities and information as the employees can make their registrations throughout the day – wherever they are working.

GPS LOCATION ON REGISTRATIONS

If the device where ProPC is installed can track its position, this information can also be added to the registrations.

INCREASED MOBILITY AND LESS ADMINISTRATION

Employees achieve freedom of movement with the ability to make all registrations continuously whether or not they have access to the corporate network. That minimises manual administration and all the day's registrations are already made when the employee returns to the office.

RAPID INVOICING

At the same time ProPC strengthens the invoicing of customer deliveries as data is gathered and validated on an ongoing basis. The company can therefore quickly capitalise work performed such as service visits and repairs.

SUPPORTS COMPANY GROWTH

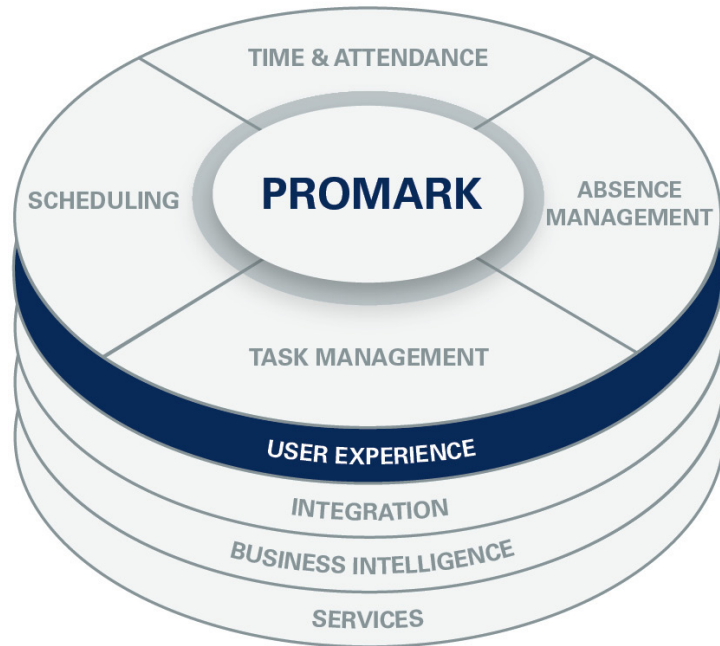

Finally, it is easy to set up new terminals as the company expands or restructures since it only requires a simple installation on pc or tablet with Windows.

PROMARK WORKFORCE MANAGEMENT

ProPC is one of the user interfaces in ProMark Workforce Management.

Learn more about the other ProMark user interfaces on our website under Products >

User experience or contact us at +44 808 23 44 786 for more information on other options.

TIME AND ATTENDANCE

Registration of working hours and deviation reasons validated against collective and local agreements creates the correct payroll basis

ABSENCE MANAGEMENT

Advanced handling of accrual, use and transfer of holiday. Sickness management with distribution on the right accounts and workflows for follow-up and overview

TASK MANAGEMENT

Registration of employee activities (job, project and process) refines ERP data for follow-up on resources and productivity

SCHEDULING

Planning and scheduling for effective use of company resources – even in case of deviations

USER EXPERIENCE

Smartphones, portal and terminals for registration, overview and approvals

INTEGRATION

Standard integration to payroll/HR/ERP ensures exchange of important data

BUSINESS INTELLIGENCE

Reports and analysis of data for measuring absence, productivity and savings

SERVICES

Hotline, private cloud, application management, superuser service and hardware service that ease the daily operation of ProMark

2019-06
