

PROMARK WORKFORCE MANAGEMENT

ProReport

PROREPORT – DECISIONS BASED ON FACTS

ProReport is a reporting tool for sharing information. It allows you to present and distribute data in ProMark in the shape of automated reports and statistics that help your entire organisation make decisions based on facts.

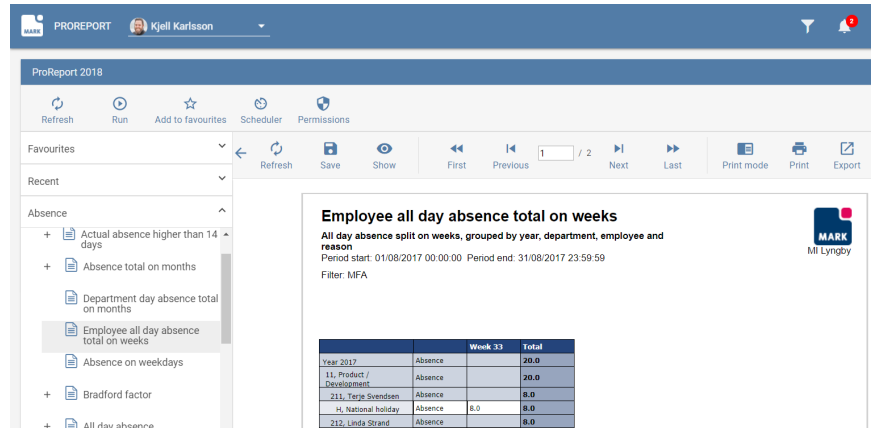

Via our web portal, managers and employees can get easy access to reports and make their own reporting as and when they want.

EXTRACTING KEY DATA

PROREPORT REPORTS ON DATA IN PROMARK

ProReport extracts key data collected in ProMark and delivers these as a series of standard reports. Reporting relates to all types of registrations such as attendance, absence, projects and activities as well as production data.

STANDARD OR TAILORED REPORTS

The 40 standard reports in ProReport cover most business needs. Additionally, the superuser can create his/her own reports adapted to your company's specific needs, and export them to either Word, Excel or as a pdf.

AUTOMATIC DISTRIBUTION OF REPORTS

EASY SHARING OF KNOWLEDGE AND FACTS

ProReport allows the superuser to effectively share information across departments and divisions through planned distribution of reports in standard formats. For instance, a report can be set up to run in the evening and then be sent via email to the relevant recipients ready for when they come to work. And the superuser can adjust recipients and the report filter on planned reports.

CURRENT AND IDENTICAL INFORMATION FOR ALL

This makes knowledge sharing easier, saves time, and ensures that all the relevant people have identical and current information.

DIRECT WEB ACCESS

INDIVIDUAL ACCESS TO REPORTING

The new web access to ProReport gives all registered users easy access to data and reporting via ProPortal.

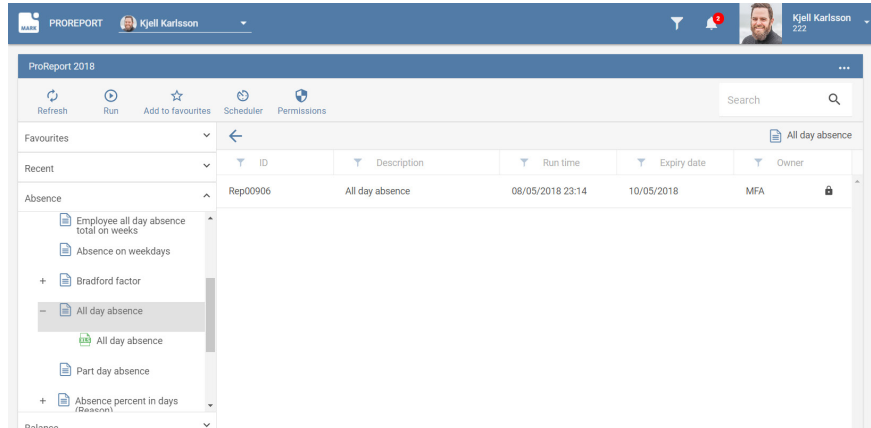

INTUITIVE AND USER-FRIENDLY

This interface is highly intuitive and uncomplicated both in design and use. It gives users and managers easy access to draw the reports they want – either right away or at a specified time. As default, reports created are private but can be made public or shared with specific users.

ProReport

ACCESS AND RESTRICTIONS

Your superuser can restrict access for the individual users so that they only see the reports that are relevant to them. Similarly, user rights in ProMark also apply so only data on relevant employees will be included in the reports for that user.

YOUR COMPANY'S BENEFITS IN SHORT

- UP-TO-DATE OVERVIEW OF THE FACTS**
 The automatic distribution of reports provides an up-to-date overview of the facts with actual information to the relevant recipients. In this way, the company can avoid dependence on statistics from the previous quarter.
- RELEVANT USERS HAVE DIRECT ACCESS**
 Managers and users can quickly get any reports they need in the day to day running of the business. Employee filters can be predefined to assist inexperienced users in their selection.
- FACT-BASED AND EFFECTIVE DECISIONS**
 Through easy availability, clear presentation and effective distribution of the data already gathered in ProMark, ProReport allows you to make fact-based and thus more qualified decisions for your company.

ProReport

ANALYSIS OF CAUSE AND EFFECT RELATIONSHIPS

PROBI – TAKING REPORTING A STEP FURTHER

It is a well-known fact that information often stimulates further questions regarding relevant cause and effect relationships. Your company may need to carry out ad hoc analyses for the company's specific and immediate needs, including continuous enhancement of internal analyses and reports adjusted to a changeable daily operation. In such cases, the standard reports in ProReport may be inadequate, and you may choose to take reporting a step further by implementing ProBI.

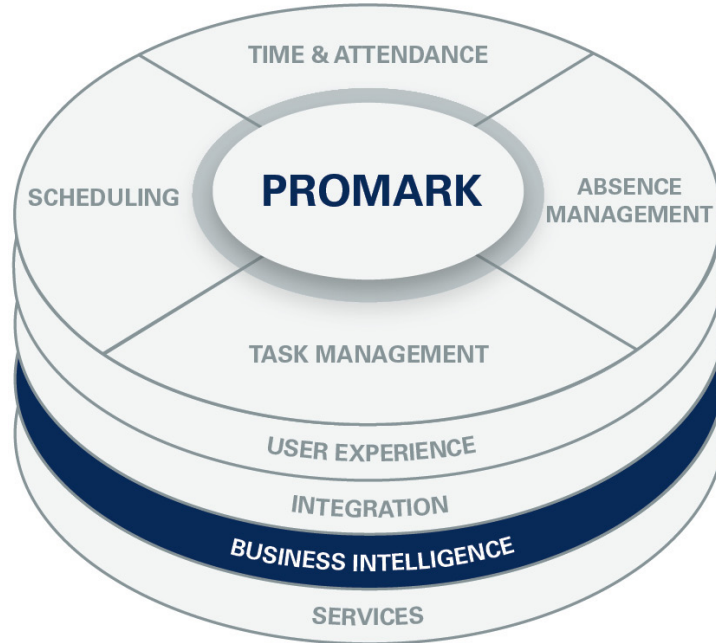

BUSINESS INTELLIGENCE

ProBI is Mark Information's Business Intelligence solution. It enables the analysis of workforce management issues based on the data contained in ProMark. ProBI is a flexible tool capable of presenting data via ProMark's web portal or in a data cube with options for integration with the rest of the company's Business Intelligence environment.

Read more in the product sheet on ProBI or on our website under [Products > Business Intelligence](#).

PROMARK WORKFORCE MANAGEMENT

ProReport is a part of the Business Intelligence solutions in ProMark Workforce Management. ProMark helps to manage companies' largest and most valuable and strategic resource – the workforce. Contact us at +44 808 23 44 786 for more information about all opportunities or go to www.mark-info.co.uk.

TIME AND ATTENDANCE

Registration of working hours and deviation reasons validated against collective and local agreements creates the correct payroll basis

ABSENCE MANAGEMENT

Advanced handling of accrual, use and transfer of holiday. Sickness management with distribution on the right accounts and workflows for follow-up and overview

TASK MANAGEMENT

Registration of employee activities (job, project and process) refines ERP data for follow-up on resources and productivity

SCHEDULING

Planning and scheduling for effective use of company resources – even in case of deviations

USER EXPERIENCE

Smartphones, portal and terminals for registration, overview and approvals

INTEGRATION

Standard integration to payroll/HR/ERP ensures exchange of important data

BUSINESS INTELLIGENCE

Reports and analysis of data for measuring absence, productivity and savings

SERVICES

Hotline, private cloud, application management, superuser service and hardware service that ease the daily operation of ProMark
