

PROMARK WORKFORCE MANAGEMENT

ProTerminal Kaba

ROBUST REGISTRATION TERMINAL FOR PROMARK

With ProTerminal Kaba, your company gets a robust registration terminal for collection of data to ProMark. The terminals are typically mounted at the entrance or in other strategic places in the company where employees can easily make their registrations.

ProTerminal Kaba is available in different versions and with different readers, depending on the company's needs. Common to them is that all communication goes directly to the ProMark application and works seamlessly with registrations via other user interfaces.

ProTerminal Kaba

ALL TYPES OF REGISTRATIONS

THE ROBUST REGISTRATION TERMINAL FOR PROMARK

ProTerminal Kaba is a robust registration terminal for collection of data to ProMark. The terminal is typically mounted at the entrance or some other easily accessible place in the company. It permits employees to clock in and clock out and register how their time is spent on jobs or activities.

TERMINALS FOR ALL PURPOSES

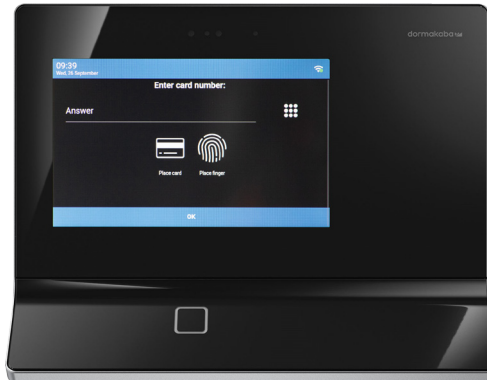

ProTerminal Kaba can be used in conjunction with the other user interfaces to collect data for ProMark. Hence, the company can choose the optimum solution for all employee groups in relation to working processes and physical location. The communication takes place in real time as the terminal is online with the ProMark database.

TAILOR-MADE DIALOGUE

The dialogue is set up in ProMark and so it reflects the company's own language and terms. It can be managed per employee category for optimum data collection.

INTELLIGENT REGISTRATION

PROMPT AND INTELLIGENT REGISTRATION

ProTerminal Kaba is intelligent so it registers deviations and will ask for deviation reasons. If an employee has not clocked in on a working day, the terminal will ask for a reason the next time the employee attempts to register. It is not possible to complete a new registration until the reason has been indicated which improves the quality of the registrations and reduces administration for the employee's manager.

SIMPLICITY FOR THE EMPLOYEE

The terminal makes it easy for the employees to register. Apart from attendance and absence, they can indicate how they spend their time on various activities or jobs e.g. on the shop floor.

OVERVIEW OF PERSONAL INFORMATION

ProTerminal Kaba allows the employees to check their own information on holiday, flexi-time or other balances. Thus, the employees no longer need to contact the HR administration to get this kind of information.

ProTerminal Kaba

WIRELESS OR VIA CABLE

TECHNOLOGY AND READERS

Communication takes place via Ethernet, WLAN or 3G. Power over Ethernet (PoE) is standard but the terminal can also be connected to external power supply.

BUILT-IN READER

The terminal has an integrated RFID reader. This means that the reading is carried out touch free. In addition, other types of readers e.g. magnetic cards, 1D barcode scanners and biometric readers can be connected.

CORRECT PAY AND TRANSPARENCY

CORRECT DATA FOR PAYROLL AND OVERVIEW OF THE BUSINESS

Regardless of the registration method, the employee is guaranteed the correct payroll basis as data is collected directly at the source – the employee. In addition, ProTerminal Kaba creates transparency as all employees can access their own information at any time.

APPROVALS AND ACTION

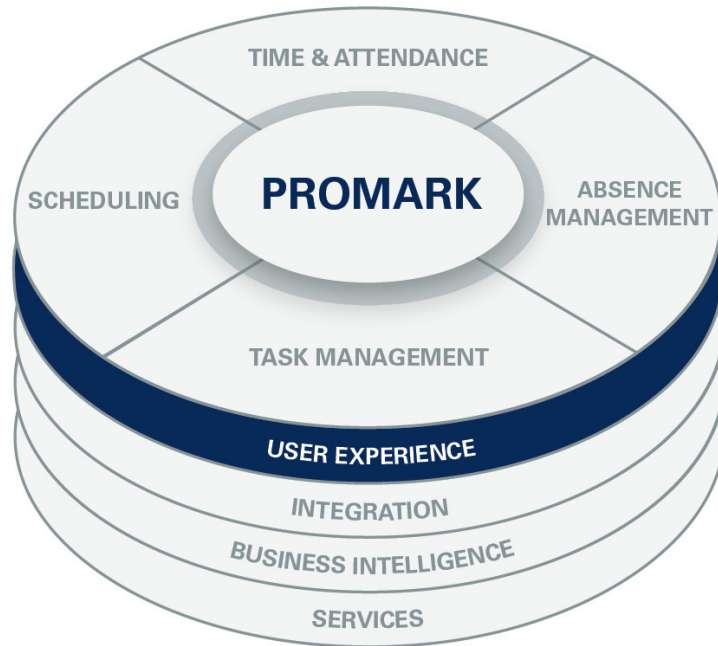

The company defines which absence and other deviations should be approved or otherwise responded to.

ENSURES BASIS FOR OPTIMISATION

The collected data gives a better overview of the status of all current jobs and activities. This ensures validity of production hours, more accurate analyses and provides a better basis for optimisation.

PROMARK WORKFORCE MANAGEMENT

ProTerminal Kaba is one of the user interfaces in ProMark Workforce Management. Learn more about the other ProMark user interfaces on our website under Products > User experience or contact us at +44 808 23 24 786 for more information on other options.

TIME AND ATTENDANCE

Registration of working hours and deviation reasons validated against collective and local agreements creates the correct payroll basis

ABSENCE MANAGEMENT

Advanced handling of accrual, use and transfer of holiday. Sickness management with distribution on the right accounts and workflows for follow-up and overview

TASK MANAGEMENT

Registration of employee activities (job, project and process) refines ERP data for follow-up on resources and productivity

SCHEDULING

Planning and scheduling for effective use of company resources – even in case of deviations

USER EXPERIENCE

Smartphones, portal and terminals for registration, overview and approvals

INTEGRATION

Standard integration to payroll/HR/ERP ensures exchange of important data

BUSINESS INTELLIGENCE

Reports and analysis of data for measuring absence, productivity and savings

SERVICES

Hotline, private cloud, application management, superuser service and hardware service that ease the daily operation of ProMark
